DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-2, 6-7, 9-18, 22-23 and 26-283 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2, 4-5, 7-15 and 16-20 of copending Application No. 9/967,615. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite means or steps that are substantially the same and that would have been obvious to one of ordinary skill in the art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

3. Claim 1 of the instant application recites the limitation of embedded operating system based computer, which does not appear in claim 1 of copending application 9/967,615.

However, embedded operating system based computers are old and well known in the art.

Art Unit: 2116

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use an embedded operating system based computer, because it has a very flexible hardware configurations (microprocessor, I/O, memory, etc.) and it provides the advantage of fast boot times

4. Claim 22 of the instant application recites the limitation of embedded operating system based computer, which does not appear in claim 11 of copending application 9/967,615.

However, embedded operating system based computers are old and well known in the art.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use an embedded operating system based computer, because it has a very flexible hardware configurations (microprocessor, I/O, memory, etc.) and it provides the advantage of fast boot times

5. Claims 23, 26-28 of the instant application are identical to claims 2, 4-5, 7-15 of copending application 9/967,615.

6. Claims 2, 6-7, 9-18 of the instant application are identical to claims 17, 18-20 of copending application 9/967,615.
